WHAT IS SMART PARKING?

We help parking lot owners, garage owners, churches, businesses, gyms, restaurants, apartments, and hotels manage and monetize their parking assets.

Quick and contactless parking. No need for expensive, germ filled parking machines. No expensive repairs to make, no setup cost. No paper tickets to keep up with. Everything is via smart phone. Use the app or simply call in.

We offer customizable solutions for your lot. Rent a few spaces or the entire lot. Rent 24/7 or only during certain times. You can block off times when you have events and need the lot giving you 100% control.

HOW DOES IT BENEFIT ME?

A stress free, easy way to increase revenue without raising rent or management fees.

A hands free, modern solution for your parking lot. We handle everything, allowing you to simply relax and collect passive income.

There is a shortage of parking in Atlanta. The city will not allow developers to build more surface lots or stand alone garages. Take advantage of the huge market looking for alternative parking solutions.

Issue monthly permits or let drivers pay hourly. Easy web and mobile payments. No cash or paperwork necessary. 100% contactless parking, keeping you and your parkers safe.

Know who is in your lot. Register visitors and guests and let the public pay for parking.

WHY IS IT BETTER THAN OTHER OPTIONS?

No high installation cost, no setup fees. No long term leases and contracts! No Merchant fees or accounts to set up! Plus we offer a 30 day no obligation free trial!

No expensive equipment to purchase. Parking machines break down from wear and tear, vandalism damage, and require ongoing maintenance contracts. Old machines are germ factories and create long lines for people trying to pay. With Smart Parking, customers can pay from the safety and comfort of their own vehicle.

Receive weekly revenue payouts.

Transparent parking metrics. See exactly how many of your spaces were sold and at what price. No collecting cash from meters and boxes.

Environmentally friendly! We have eliminated the need for paper tickets and environmental waste.
