

SOLAR SERVICE PRICING GUIDE

We break our services into two primary categories: Roof or Ground. Some service may require both scopes to be considered or addressed; however, most are able to be narrowed to an area through basic investigation.

Roof Equipment Services

Module Level Electronic Replacement through RMA (Micro-inverter or optimizer), \$395

Includes:

- ✓ Remote investigation of the equipment including communicating with manufacturer.
- ✓ Labor to replace equipment. Includes setup, demobilization, and moving the panel associated with the problematic device.

Exclusions:

- Cost considers the equipment is approved from the manufacturer for an approved replacement under warranty. If equipment is not approved for replacement or is outside of warranty, additional material costs will be required.

Adders:

- + \$45 for each panel that is required to be moved to access the equipment, not including the associated panel and one more.
- + \$95 for each additional equipment replacement.

Roof Wire Damage, \$400

Includes:

- ✓ Lifting and replacement of each panel and the repair or replacement of any wire damage in the concerned area for the first four modules.
 - Disclaimer: This is a minimum count; fewer modules will be charged at the same rate; additional modules will be charged per the adder.

Exclusions:

- Does not include the replacement of any solar equipment (modules, optimizers, micro-inverters, etc). Team will make best effort to repair equipment, but some damage is too severe for replacement.
- Should a module need to be replaced, Boss Energy will identify the closest available module from local suppliers. This will be sold for an additional cost. If that option does not meet requested criteria, the replacement will be the responsibility of the homeowner.

Adders:

- + \$100 per module of concern.

Critter Guard, Priced per Project

Includes:

- ✓ Installation of netting to deter animals from getting under array.

SOLAR SERVICE PRICING GUIDE

We break our services into two primary categories: Roof or Ground. Some service may require both scopes to be considered or addressed; however, most are able to be narrowed to an area through basic investigation.

Ground Equipment Services

Full System Outage Investigation, \$395

Includes:

- ✓ Remote investigation of the equipment including communicating with manufacturer.
- ✓ Onsite investigation to gather additional research of issue.
