Tree Watering Guide

Alfaro Tree Sales, Inc. provides a planting guarantee for one year. Client must provide proper care and watering. Alfaro Tree Sales is not responsible for damage done to tree(s) by act of nature.

Using a sprinkler system or a tree gator bag will not cover your tree under Alfaro Tree Sales, Inc. warranty.

Manual watering or other appropriate watering systems such as bubblers & drip line systems are recommended for the first 16 months from the date of tree planting to water your new tree(s).

Here are some guidelines to follow when caring for your tree after it has been installed

Newly planted trees & younger trees will require more frequent watering vs. an older/mature and/or well-established trees.

Watering:

- *Alfaro Tree Sales, Inc. crew will complete the first watering at the time of planting.
- *Tree(s) are installed with a brim or “water-well” created around the rootball specifically sized for the caliper size of your tree(s). This will also lessen the chance of water run off during watering process.
- *Do not water tree(s) at a fast rate. The water flow should be a slow to medium rate to allow the water to remain within the water-well for the benefit of the newly planted tree(s).
- *A newly planted tree should be watered and monitored.
- *An established tree (after 16 months of planting) should be watered according to the seasons, weather conditions, size of tree, soil type, etc...

Amount of water per size of tree:

This is an approximate guide to help the customer care for their tree(s). Over watering and under watering will cause tree(s) to go into shock and/or cause tree(s) to decline.

The weather, soil conditions, location of tree(s), species of tree(s), etc. will vary the amount of watering.

Manual Watering: Per Season/ Per Container Size

***Winter**

15 gallon | b&b | 1.25-1.5 “ caliper

1 x per week

5-7 gallons per tree/ per watering

30 gallon | b&b | 2-2.5“ caliper

1x per week

10-12 gallons per tree/ per watering

45 gallon | 24” box | 2.5-3“ caliper | b&b

1x per week

12-15 gallons per tree/ per watering

65 gallon | b&b | 3-3.5“ caliper

1x per week

20 gallons per tree/ per watering

95 gallon | 30” box | 4-4.5“ caliper | b&b

1x per week

30 gallons per tree/ per watering

200 gallon | 42” box | 5-5.5“ caliper | b&b

1x per week

50 gallons per tree/ per watering
