

SMART HOME DEVICE INSTALLATION TECH

We Are Hiring!

Tasks To Be Performed:

- Installation of smart technology devices in multi-unit homes. Smart Locks, Smart Thermostats, Smart Sensors and the Hub.
- Pairing all devices to the hub using an App on your phone or tablet.
- Preparing each space for the install - blankets at work areas, building kits, testing existing locks and thermostats, and so forth.
- Wearing a face mask, gloves, and shoe covers at all times
- Leaving each space cleaner than when you arrived, key metric #1. Leaving a work space a mess is not acceptable - even on day one.
- Entering daily notes in our App for your work completed and any issues you encountered.
- Communicating with your field supervisor.
- Arriving on time each and every day ready to work and be apart of the team.

Some requirements to perform this type of work

- Can stand, stoop, squat, walk, climb stairs up and down, for a full work day.
- Moving at swift pace for the duration of the day. Your team will move at a steady pace, you will have to do the same.
- Working outdoors at times to move between units or spaces of work. It's summer time, you will sweat everyday.
- Comfortable on ladders up to 8' height.
- Proper use of basic power tools, a drill, electric screwdriver, Dremel, and so forth.
- Proper use and has their own basic hand tools - screwdrivers, cutters, knives, bubble level, misc. items.
- Travel
